

DB queries

DB schema

Table – listings

Key fields - listing_id, title, price, bedrooms, city_id, status, created_at

Queries

Verify listings in the range of prices

```
SELECT listing_id, title, price
```

```
FROM listings
```

```
WHERE price < 300000 OR price > 600000;
```

Verify if there are missing price, bedrooms, or city reference:

```
SELECT listing_id, title, price, bedrooms, city_id
```

```
FROM listings
```

```
WHERE price IS NULL
```

```
OR bedrooms IS NULL
```

```
OR city_id IS NULL;
```

Hypothetical Bug Report

Title: *The price filter not applied when using pagination result*

Environment:

- Website: Livabl.com
- Browser: Chrome
- OS: Windows 11
- Date/Time: 03 Dec 2025

Steps to Reproduce:

1. Go to Livabl.com
2. In the search bar, enter “Chicago”.
3. Apply price filter: \$300,000–\$600,000.
4. Scroll to the bottom of the listing results.
5. Click on the second page
6. Observe newly loaded listings.

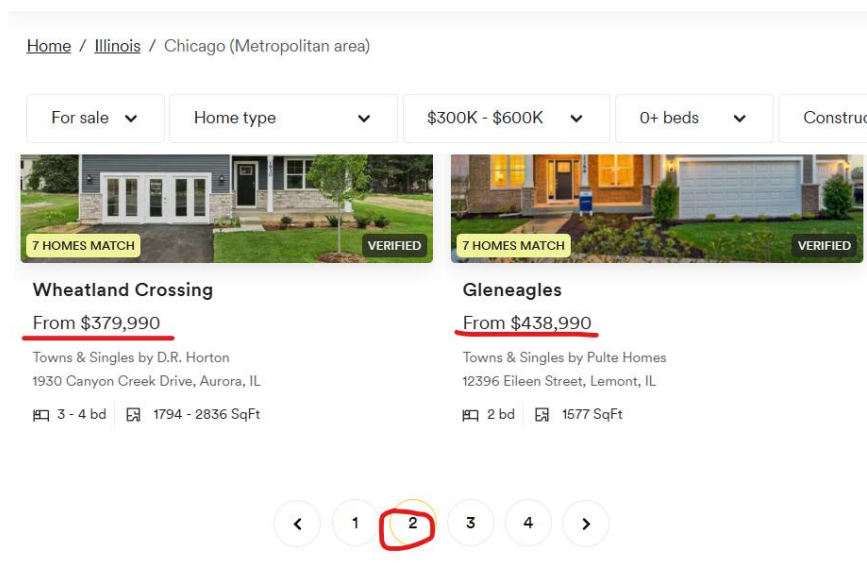

Expected Result:

- All listings displayed should remain within the \$300k–\$600k price range, even after clicking *Load More*.

Actual Result:

- Listings outside the price range appear after clicking *on the second page*

Evidence:

Severity: High

Suggested Fix: Ensure price filter parameters persist when fetching additional results.
